

MASTERMAX™

DECKMAX™

Decking Stain

Water Based • Oleoresinous • Acrylic System

- Innovative, low sheen, water based timber decking stain
- Semi-transparent colours retain the natural grain of the timber
- The blend of linseed oil and resins provide a durable and protective finish
- Recoat new pine after 2 hours & other surfaces overnight
- For pine & hardwood timber decks, outdoor furniture, fences and houses
- Preparation is key... use PREPMAX Timber Clean & Prep to prepare the surface prior to coating
- Available in Test Pots, 4 litres & 10 litres

MITRE 10

MASTERMAX™

DECKMAX™

Decking Stain

Water Based • Oleoresinous
Acrylic System

Leading edge oleoresinous, acrylic technology has been used to formulate this decking stain. This technology ensures DECKMAX stain has the combined properties of penetration of the timber, film hardness to protect walk-on surfaces & shorter touch dry time.
